

What happens when someone tests positive for COVID-19 in ASM facilities (Lutz, Gately, Block 37, Cultural Center, and Ryan Learning Center @ The AIC)?

STEP 1

When a confirmed or probable case of COVID-19 is identified in an ASM facilities (Lutz, Gately, Block 37, Cultural Center, and Ryan Learning Center @ The AIC), our contact tracing team will determine if the individual was in the building while contagious and establish who were close contacts.

NOT Exposed | NOT a Close Contact

Includes anyone who was in the building the same day as the positive individual, but DID NOT interact with the case in a way that defines them as a close contact. Simply being in the same building or at the same event as a positive or symptomatic person does not mean you are a close contact or need to quarantine.

Exposure | Close Contact

The Centers for Disease Control and Prevention define close contact as being **within six feet of a COVID-19-positive person with or without a mask for 15 or more minutes within a 24-hour period.**

STEP 2

After completing an interview with the individual who tested positive and reviewing entrance logs of the ASM facility, the contact tracing team will notify any individuals who were in the building during the same time with either:

- a. A notification to confirm that they were in close contact and need to quarantine

- b. A notification to confirm that they were NOT in close contact and do not need to quarantine.

If you think you have been in close contact with someone who has tested positive or are experiencing any symptoms, please consult your healthcare provider and get tested. If you test positive and were in an ASM facility, please report your test result promptly to ASM using the [ASM Self-Reporting form](#) or by calling the ASM Contact Tracing Hotline at 312-768-5198. Your help is the key to keeping our communities safe.
